

CAPABILITIES STATEMENT

Company Overview

Guardian IT, LLC is a Georgia-based Managed Service Provider (MSP) delivering secure, scalable, and cost-effective IT and management consulting solutions to government and commercial clients. We specialize in proactive IT management, cybersecurity, cloud services, and program support that enables organizations to operate efficiently and securely. With over a decade of experience, Guardian IT provides both hands-on technical support and strategic consulting, supporting mission-critical operations across diverse environments.

Core Competencies

- Managed IT Services (MSP)
- Help Desk & End-User Support (Remote & On-Site)
- Cybersecurity & Risk Management
- Network Monitoring & Infrastructure Management
- Cloud Services, Hosting & Data Processing
- Data Backup & Disaster Recovery
- IT Consulting & Strategic Planning
- Virtual CIO (vCIO) Services
- Program & Project Management Support
- Administrative & Operational Support Services
- VoIP & Unified Communications
- Mobile Device Management (MDM)
- IT Training & Workforce Development
- Custom Software Development & Systems Integration

Contracting Approach / Vehicle Strategy

Guardian IT pursues federal opportunities through a phased contracting strategy designed to deliver immediate value and long-term scalability:

- **Subcontracting Partnerships:** Actively teams with prime contractors on existing contract vehicles (GSA MAS, GWACs, IDIQs) to support IT services, cybersecurity, and program management requirements while contributing to small business subcontracting goals (FAR 52.219-9).
- **Prime Contract Readiness:** Builds past performance and CPARS ratings through subcontracting and direct awards to position for prime contracting opportunities.
- **Contract Vehicle Participation:** Targeting participation in GSA Multiple Award Schedule (MAS), agency-specific BPAs, and government-wide acquisition contracts (GWACs) to provide streamlined procurement access for federal agencies.
- **Flexible Engagement Models:** Supports fixed-price, time-and-materials, and labor-hour contracts across IT, consulting, and administrative service domains.

Certifications & Technical Expertise

- CompTIA (A+, Network+, Security+)
- Microsoft Certified Solutions & Cloud Certifications
- Cisco (CCNA/Networking Technologies)
- VMware Virtualization Technologies
- Cybersecurity Best Practices & Framework Alignment (NIST, CIS)
